

“Seven 50” in Martin County

“...a must attend meeting for concerned citizens!! “

Martin County Commissioners may vote on adopting Seven 50 at this meeting:

December 17, 2013 * 9am

Martin County Commission Chambers

2401 SE Monterey * Stuart, FL

*“...even the left-dominated St. Lucie County Commission
could not stomach this level of Federal intrusion,
and voted to reject Seven 50“*

***SAY NO TO FEDERALLY
MANDATED
HI-DENISTY ZONING***

What is Seven/50?

Including Martin, it is a 7 county, 50 year plan that is overseen by 200 unelected bureaucrats in seven south Florida counties. The objective is to plan the seven county region. The plan is to be controlled by the federal government, and unelected bureaucrats. Seven/50 is a plan being financed by HUD (Housing and Urban Development), the EPA (Environmental Protection Agency), and US DOT (Department of Transportation). This is a federal overreach, designed to control your county & city planning, zoning process, and allow the federal government to implement their socially engineer policies in your community. They will do this without your knowledge, without your vote, and without your consent, but with your tax dollars.

What will Seven 50 planners do?

The Seven/50 planners received an initial 4.25 million dollar federal grant from HUD. They have designed a plan that will change the way our communities look, how and where we live, force us out of our cars (global warming), and force us into urban communities with high rise buildings built along mass transit. Their focus is to have us walk and bike more in order to have a more "sustainable community."

Who are the winners and losers under Seven 50?

The winners are big government agencies and privately owned planning firms who stand to make millions. The losers are Martin County residents who will have their property rights usurped and saddled with outrageous taxation. That is why the *St. Lucie & Indian River County Commissions and the City of Vero Beach rejected Seven 50*. For more info, go to www.ac4pr.org.
